Total:			399,999		399,999	

Abstract:

European initiatives like the Long-Term Vision for Rural Areas and the European Rural Pact aim to make rural areas more welcoming, resilient, and appealing. But real progress is only possible if young people in these areas are actively involved and have the right tools for jobs and civic engagement. Because of that we created the RISE project to support rural youth in Europe by connecting them across borders, improving their digital and business skills, and encouraging them to take part in local and European decision-making.

The project will help young people in rural areas strengthen their communities, bridge the digital divide, and find job opportunities without having to move away. Aligned with Erasmus+ priorities, RISE promotes inclusion, enhances digital skills, and advances sustainability.

Our project objectives:

OBJECTIVE 1: To ensure efficient, transparent and sustainable management of the RISE project through strategic coordination, financial monitoring and quality control

OBJECTIVE 2: To create a transnational network of rural youth that strengthens their collective identity, fosters the exchange of experiences and knowledge, and connects rural communities from different countries.

OBJECTIVE 3: To strengthen the key competencies of rural youth for their integration into the labor market, with special emphasis on digital opportunities and innovative entrepreneurship.

OBJECTIVE 4: To empower rural youth to take an active role in the design and implementation of local impact projects, strengthening their capacity to collaborate with municipalities and community actors.

OBJECTIVE 5: To encourage the active participation of rural youth in decision making at local, national and European level, promoting their dialogue with policy makers and key institutions.

OBJECTIVE 6: To ensure that the impact of the RISE project reaches a greater number of rural youth through innovative and sustainable dissemination strategies, led by the participants themselves.

Evaluation Summary Report

Evaluation Result

Total score: 68.00 (Threshold: 60)

Criterion 1 - RELEVANCE

Score: 22.00 (Threshold: 15 / 30.00 , Weight: -)

The detailed criteria are set out in the call conditions (see Call document).

The proposal is highly relevant to the general objectives of the action, as it addresses critical challenges faced by rural youth, such as limited access to education, employment, and digital skills. It aligns with the Erasmus+ Program's priorities of inclusion, digital transformation, and ecological transition. The project supports the EU Youth Strategy 2019-2027 by focusing on inclusion, digital skills, and youth participation in decision-making. The project partially demonstrates the EU added value, but does not clearly explain how it will ensure the scalability and replicability of its outcomes across non-EU countries. The proposal is relevant for EU values by promoting democracy, equality and human rights. However, it does not explicitly address how it will ensure non-discrimination in all activities. The objectives are clearly formulated and pertinent to the topic. However, the proposal does not provide sufficiently detailed descriptions of how each objective will be operationalized and linked to specific activities. The objectives are measurable as the proposal clearly lists the necessary indicators attached to each of the objectives. They are also reliable. Target groups are defined and the objectives are relevant to them. Young people are actively involved in various stages of the project, including training, networking, and policy discussions. However, the proposal does not clearly outline how their real involvement will be incorporated into the project's ongoing implementation and evaluation. There is a description of needs rather than a true needs analysis and it does not sufficiently build on specific data on the needs of rural youth in each partner country to ensure a more tailored approach. The description is sufficiently documented and applicable to all organisations and countries. It makes a very good link with the target groups of the proposal. The proposal involves young people, including those with fewer opportunities. Their participation is very well aligned with the overall objectives of the project. It is also relevant and justified. The consortium is equipped to reach out to these groups. However, the proposal does not provide sufficient evidence of how it will ensure the credibility and representativeness of their participation. The proposal does not elaborate sufficiently on whether young people were involved in the project design stage. The obstacles to the participation of young people with fewer opportunities were not given sufficient consideration.

Criterion 2.1 - QUALITY - PROJECT DESIGN AND IMPLEMENTATION

Score: 16.00 (Threshold: 15 / 30.00 , Weight: -)

The detailed criteria are set out in the call conditions (see Call document).

The work plan is overall of sufficient quality and detailed. It includes all phases appropriate for a project of this nature. However, it does not clearly demonstrate detailed intermediate milestones within each phase, which facilitate smoother progress tracking. The work plan follows a logical structure, but it does not clearly demonstrate the alignment of certain activities, such as the platform launch, with the overall timeline. While the proposal considers some project management methodologies, it does not clearly demonstrate the use of established methodologies which add structure and flexibility to the project management approach. The proposal includes quantified information, but it does not clearly demonstrate specific numerical targets for all Key Performance Indicators (KPIs), which enhance its measurability.

There is a good link between needs analysis, project objectives and activities proposed. Activities are overall consistent with the objectives. However, the proposal does not clearly demonstrate explicit links between some activities (e.g., the Brussels trip) and their respective objectives. The overall methodology behind the project is not elaborated upon in sufficient detail. Therefore, it is not fully clear whether it matches the identified needs. Both qualitative and quantitative indicators are foreseen, but the proposal does not clearly demonstrate specific, measurable targets for each indicator.

There is a risk management plan, even though the list of identified risks is not sufficiently detailed and the proposal does not clearly demonstrate specific actions for high-impact risks. Quality control measures have also not been fully addressed and the proposal does not clearly demonstrate how quality will be maintained across all deliverables and activities.

The allocation of resources in the budget is not fully clear. For example, equal resources were allocated to all partners in several WPs but their efforts are not equal as there is a designated coordinator/lead. This concerns both PM and allocation of money. Therefore, the budget allocations are not always fully justified and not fully distributed in line with the partners' responsibilities. The budget is overall cost-effective, but the proposal does not clearly demonstrate a detailed cost-benefit analysis to justify in detail the cost-effectiveness of the activities. Budget allocation is justified, but the proposal does not clearly demonstrate a detailed explanation of how specific costs are calculated. The management and coordination costs are in general proportionate to the number of partners to coordinate and the nature of the project. The resources allocated to work packages overall are in line with the objectives and deliverables.

Criterion 2.2 - QUALITY - PARTNERSHIP AND COOPERATION ARRANGEMENTS

Score: 16.00 (Threshold: 10 / 20.00 , Weight: -)

The detailed criteria are set out in the call conditions (see the Call document).

The consortium's competencies align well with the project's objectives, but the proposal lacks clarity on how these will be integrated to address specific rural challenges. The participants have an appropriate mix of complementary expertise. Their description is rich enough but the proposal is not detailed enough about the explicit mechanisms for inter-partner knowledge transfer and capacity-building. The partnership is international but not truly pan-European as the balance is on West European states. The consortium has potential to develop local NGO capacities, but lacks a clear strategy for involving and empowering less-established organizations.

The partners have meaningful roles to play in the project, an issue which is clearly and directly communicated in the proposal. The coordinator is suitable for coordinating a consortium of this scope and size.

Governance mechanisms are well-described, yet the proposal does not sufficiently address potential cross-cultural implementation challenges. The proposed mechanisms are designed for effectiveness, but strategies to overcome cultural differences and language barriers are not adequately addressed. The proposal does not pay enough attention to issues such as conflict prevention and management within the consortium. Therefore, it is not fully clear whether the coordinator will be able to effectively manage possible conflict emerging between partners and or stakeholders.

Criterion 3 - IMPACT

Score: 14.00 (Threshold: 10 / 20.00 , Weight: -)

The detailed criteria are set out in the call conditions (see the Call document).

The potential impact on participants and participating organisations is well described but not fully measurable as with the detail list of impacts, there is insufficient attention paid to the measurement indicators attached to them. The proposal acknowledges broader societal impacts, encompassing local communities, policymakers, and other NGOs. However, it falls short in elucidating mechanisms for monitoring and sustaining these external impacts, particularly in communities not directly engaged in the project. While the proposal discusses its potential for localized expansion through multiplier events and peer-to-peer learning, it lacks a detailed roadmap for transitioning from cross-border to localized initiatives.

Some risk to impact is included in the overall risk assessment but it has not been elaborated in enough detail. Also, the proposal does not sufficiently explore quality measures to impact.

The sustainability plan outlined in the proposal emphasizes network expansion and peer-to-peer learning. However, it lacks a sufficiently concrete strategy for securing ongoing funding and resources beyond the initial project period. While the proposal identifies key resources such as training materials and partnerships, it does not sufficiently address a detailed financial strategy or resource allocation plan.

There is a dissemination plan included in the proposal. However, it is not detailed enough when it comes to the particular description of actions or identifying specific targets, timing and role distribution among the partners within this task. Results will promote various objectives, however, the proposal does not sufficiently explain how results will be integrated into partner organizations' work beyond the project or how they'll be tailored to specific target groups. The application describes various methods, however, it doesn't explicitly state if all results will be freely available or how intellectual property rights and data privacy will be managed in dissemination.

Scope of the proposal

Status: Yes

Comments (in case the proposal is out of scope)
